1.02 Background:

Founded in 1868, Oregon State University is a comprehensive, research-extensive, public university located in Corvallis. OSU is a member of the Oregon University System and one of only two American universities to hold the Land Grant, Sea Grant, Space Grant and Sun Grant designations. OSU is also the only Oregon institution to hold the Carnegie Foundation's top ranking for research universities, a recognition of the depth and quality of OSU's graduate education and research programs.

Through its centers, institutes, Extension offices and Experiment Stations, OSU has a presence in almost every one of Oregon's 36 counties, including its main campus in Corvallis, the Hatfield Marine Sciences Center in Newport and OSU-Cascades Campus in Bend. OSU offers undergraduate, master's and doctoral degrees through 12 academic colleges enrolling more than 25,000 students from every county in Oregon, every state in the country and more than 90 nations.

2.0 SCOPE OF WORK AND REQUIRED QUALIFICATIONS

2.01 Scope of work

➤ Instructor and Teaching Expectations:

○ Facilitation

- In both classroom-based and online courses, PACE encourages instructors to be *facilitators* of learning, which means creating a context in which students learn from each other, other sources and directly from the instructor. It also means instilling a sense of curiosity that motivates students to explore a topic independently thereby potentially uncovering additional layers of knowledge beyond what the course formally addresses. In continuing education, students are often seasoned professionals who have much to share with their classmates. An effective facilitator knows how to use this as a way of

broadening the amount of knowledge to which students are exposed, drawing connections between concepts learned in class with real-world practice. Of course, the personal knowledge and experience instructors bring to their teaching form the basic elements of any effective course.

- Interactive Learning
 - In keeping with the emphasis on facilitation, PACE expects all instructors to create numerous opportunities for students to interact with each other as they learn. In classroom-based courses, this might consist of class discussions and/or periodic breakout sessions in which small groups of students work on classroom assignments together. Online it often involves the use of asynchronous discussion forums, synchronous webinars, and coordinated group projects.
- Assessment
 - For both classroom-based and online courses, it is important to have well-defined, action-oriented learning objectives that are measurable and quantifiable. This means that an instructor can create student learning assessments such as quizzes, term papers, projects, and homework assignments that require students to demonstrate what they can do with the knowledge they acquired in the course. Ideally, each course should have at least two or three different kinds of assessment so that students with different kinds of learning abilities all have an opportunity to perform. In addition, it is vital to provide timely feedback to students on their performance so they have an opportunity to improve.

2.02 Sample Contract.

Contractors selected from the Qualified Pool to perform services will be issued a separate contract. A sample contract is included at Exhibit A.
