Emerging Small Businesses and Minority and Women Owned Businesses

PSU is committed to increasing opportunities for Emerging Small Businesses and Minority and Women Owned Businesses, and PSU strongly encourages its contractors to use these businesses in providing services and materials for PSU contracts and projects.

OVERVIEW/BACKGROUND/GENERAL REQUIREMENTS:

Portland State University's Advancement Services is requesting quotations from marketing/design firms to assist a current project in developing the design of a new constituent web portal as well as supporting marketing campaign and related materials.

The primary goal of this project is to provide an online community for alumni to realize their benefits, connect with each other, find relevant information and actively engage with PSU. Additionally, the portal will provide online events registration and online gift giving for all constituents. Finally, this project will help Advancement Services to provide expanded services internally to our development staff across campus while introducing standards and policies for consistent and more effective engagement with PSU constituents.

Constituent Connection is a module in Agilon's One System, Advancement Services' current database system for managing constituent information. In this project we are implementing the Constituent Connection web portal module and an events module.

The website will replace the current PSU Alumni Association site and expand its reach to include all constituents of PSU. The Constituent Connection module is already owned by PSU and test and production environments have been installed. The marketing/design vendor on this project will develop design options for the skin of the site that are in line with the current look and feel of the main PSU website and will install this skin on the existing system.

Concurrently, the vendor that wins this RFQ process will aid Advancement Services in developing a marketing campaign to push this new site out to alumni and constituents including the design of the marketing materials that will be used and general guidance for a roll-out plan.

The project is already underway. Project Leadership has made many high-level decisions about direction and scope. The governance of the project is well defined and work to set up the system has already begun. Additionally, a pilot group consisting of active alums is being assembled to serve as a sample group for creating content and providing feedback. Roll-out of the new site will begin with an early release of the site to this pilot group and will later expand to all alumni.
