1.0 BACKGROUND

1.01 OREGON STATE UNIVERSITY:

Founded in 1868, Oregon State University is a comprehensive, research-extensive, public university located in Corvallis. OSU is a member of the Oregon University System and one of only two American universities to hold the Land Grant, Sea Grant, Space Grant and Sun Grant designations. OSU is also the only Oregon institution to hold the Carnegie Foundation's top ranking for research universities, a recognition of the depth and quality of OSU's graduate education and research programs.

Through its centers, institutes, Extension offices and Experiment Stations, OSU has a presence in almost every one of Oregon's 36 counties, including its main campus in Corvallis, the Hatfield Marine Sciences Center in Newport and OSU-Cascades Campus in Bend. OSU offers undergraduate, master's and doctoral degrees through 12 academic colleges enrolling more than 20,000 students from every county in Oregon, every state in the country and more than 90 nations.

1.02 BACKGROUND:

OSU has identified funding through the Oregon Nanoscience and Microtechnologies Institute (ONAMI).

OSU scientists and researchers have proven that atomic layer deposition (ALD) and Plasma Enhanced Chemical Vapor Deposition (PECVD) of aluminum oxide are viable deposition techniques for fabrication of thin-film diodes for use in present display manufacturing processes.

There is presently no RIE equipment available at OSU to support the desired development. Therefore, OSU must engage a thin-film processes service provider/equipment manufacturer to investigate the feasibility of RIE processes for fabrication of thin-film diodes. The selected vendor will be expected to show that they possess equipment and expertise to support development of RIE use in the electrode patterning of OSU's thin-film diode processes. The successful vendor must have facilities and equipment located on the West Coast of the United States, in order to minimize the expense and duration of travel that will be required by the OSU development team. The intent of the described exercise is to identify a suitable process equipment vendor through which a RIE tool will be sourced in support of the ONAMI commercialization project.

2.0 SAMPLE CONTRACT/SCOPE OF WORK

2.02 SAMPLE CONTRACT:

A sample Contract containing the scope of work, contractual terms and conditions is included as Exhibit A.

3.0 PROPOSER QUALIFICATIONS

3.01 MINIMUM QUALIFICATIONS:

In order to qualify as a Responsive Proposer, the Proposer needs to meet the minimum qualifications below. After verification that the minimum qualifications have been met, OSU will award points based on the level of the Proposer's qualifications.

- a. Proposer must have at least five (5) years of experience with RIE processes and thin-film diode deposition – process development and technologies.
- b. Proposer must have (or commit to positioning prior to contract execution) development facilities and all necessary equipment on the West Coast of the United States.
- c. Proposer must have a dedicated project team which will be assigned in order to ensure deliverables within expected deadlines. The project team must consist of a Process Engineer with at least 20 years of experience, an Electromechanical Engineer and an Electronics Engineer each with at least 10 years of experience. The team's experience must all be in the specific area of custom plasma systems design and construction for novel etch and deposition processes, specifically including the PECVD deposition of aluminum oxide.

4.0 REQUIRED SUBMITTALS & EVALUATION

4.01 REQUIRED SUBMITTALS:

Proposers should submit the following information:

- a. Description of how the goods or services offered specifically meet the Scope of Work requirements described in Section 2.
- b. A summary of at least five (5) years prior experience that demonstrates expertise and familiarity with RIE process and tool development, aluminum oxide PECVD process and tool development, and thin-film diode process development and technologies.
- c. An explanation of the facilities and equipment located on the West Coast, including the specific address where these facilities are located or will be located prior to execution of a resulting contract.
- d. Names, titles, credentials, and contact information of the dedicated project team which will be assigned to the successful completion of this project.
- e. Complete and itemized pricing of the goods or services requested.
- f. Exhibit B, Certifications, fully completed.
- g. Exhibit C, References, fully completed. These references must be able to verify the experience described in Item b., above.

4.02 EVALUATION:

This is a multistage evaluation. OSU will first review all Proposals to determine Responsiveness. Proposals that do not comply with the instructions or are incomplete may be deemed non-Responsive. Proposer's deemed non-Responsive will be notified in Writing, identifying the reason(s) the Proposal is non-Responsive. The evaluation committee will then perform first stage evaluations on the Written Proposals based on the following evaluation criteria. Points will be given in each criteria and a total score will be determined. The maximum points available for each criteria are identified below.

<u>Evaluation Criteria:</u>	<u>Points:</u>
Ability to perform the milestones described in the Scope of Work	35
Breadth, depth, and length of experience in RIE processes, aluminum oxide PECVD tooling and processes, and thin-film diode technology process development	30
Proposer's presence on the West Coast of the U.S.	20
Price of the goods or services	15
Total	100

OSU may award after the first stage evaluation to the highest ranked Proposer without moving on to the second stage evaluation. If OSU decides to move to a second stage evaluation, the highest ranked Proposers from the first stage evaluation will move to the second stage evaluation. Proposers who are included in the second stage evaluation may be requested to provide additional information about their Proposal through interviews, presentations, requests for best and final Proposals or other methods relevant to the goods or services, in order for the evaluation committee to make a final determination. Points awarded in the first stage evaluation will not be carried to the second stage evaluation. Contract will be awarded to the Proposer who in OSU's opinion, best meets the requirements and qualifications of the IRFP and OSU's needs.

4.03 INVESTIGATION OF REFERENCES:

OSU reserves the right to investigate and to consider the references and the past performance of any Proposer with respect to such things as its performance or provision of similar goods or services, compliance with specifications and contractual obligations, and its lawful payment of suppliers, subcontractors, and workers. OSU further reserves the right to consider past performance, historical information and facts, whether gained from the Proposal, Proposer interviews, references, OSU or any other source in the evaluation process.

OSU may postpone the award or execution of the Contract after the announcement of the notice of intent to award in order to complete its investigation.
