

This project will comply with the Governor's executive order EO-03-03 to utilize sustainable practices in the design, construction, or renovation of new State buildings. It is our intent that this building will meet a minimum LEED Gold Certification LEED-NC (New Construction or Major Remodels). The LEED Certification will be determined based on the final scope of work as developed by the design and construction team. The Design and Construction team will be required to prepare, submit, and finalize all required design and documentation needed to receive at least LEED Gold Certification. The Design and Construction team will also be required to track the additional cost of any "green" features above and beyond standard building costs.

For additional information on LEED-NC, visit the US Green Building Council website at: <http://www.usgbc.org/DisplayPage.aspx?CategoryID=19> for a description of the programs and their Gold certification requirements.
