## SECTION 1 - ADMINISTRATIVE INFORMATION

### 1.1 INTRODUCTION

St. Helen's Court, located on Portland State University's campus, was built in 1928. The building is constructed of concrete walls with veneer brick on all sides except for one. The interior is wood framed construction with wood floor and ceiling joists and wood studded walls covered in lathe and plaster. The roof currently has two portions, the mansard roof covered in clay tile and the flat roof covered with a membrane roof. There are also two levels to the roof: the main roof, and a small roof covering the entrance in the middle of the courtyard.

### 1.2 SCOPE OF WORK

#### Base Bid

- The replacement of the existing roof with a new (SBS) modified bitumen roofing system with a 20 year warranty. This includes two (2) roof areas: the main "U"-shaped roof as well as a smaller roof directly over the main entrance located within the courtyard.
- The seismic upgrade to the roof diaphragm.

The existing membrane roof is to be removed down to the existing sheathing with all of the existing flashings. Once all seismic upgrade components have been completed the installation of a new SBS modified bitumen roofing system with associated flashings will be completed as directed by Owner's specifications.

#### Alternate Bid Items

ABI #1 – Remove and recycle existing clay tile roof over mansard roof areas and install a new clay tile roof system using a 1-piece "S" profile tile with associated flashings. Use Boral Limited ([www.boralna.com](http://www.boralna.com)) products as the basis-of-design product.

ABI #2 – Remove and recycle existing clay tile roof over mansard roof areas and install a new standing seam metal panel roof system with associated flashings. Use Firestone Building Products – UC 6 standing seam panel as the basis-of-design product.

ABI #3 – Repair the existing clay tile roof fascia gutter system by temporarily removing some of the clay tile roof as needed and providing a new liquid-applied flashing over existing gutter seams. Use Siplast Parapro 123 Flashing System manufactured by Siplast (Parapro), Irving TX as the basis-of-design product.

Reference Appendix 4.11 Drawings and Specifications for details. These drawings shall be the basis for the Base Bid and for the Alternate Bids.

Qualified Proposers will have worked on a minimum of **three projects in the last five years** that:

- Was on a building at least 30 years old

- Was occupied at time of construction
- Had a roof replacement of at least 5,000 square feet

The latest prevailing wage rates for public works contracts in Oregon are contained in the following publications: The January 1, 2014 Prevailing Wage Rates for Public Works Projects in Oregon, the January 1, 2014 PWR Apprenticeship Rates. Such publications can be reviewed electronically at [http://www.oregon.gov/boli/WHD/PWR/Pages/pwr\\_state.aspx](http://www.oregon.gov/boli/WHD/PWR/Pages/pwr_state.aspx) and are hereby incorporated as part of the Agreement Documents.
