2.0 INTRODUCTION AND BACKGROUND

2.01 INTRODUCTION AND BACKGROUND

Procurement, Contracts and Materials Management is seeking Responsive Responsible Proposers to submit Proposals for development of an integrated energy planning model for Oregon State University. Capital and operating resource needs at OSU are accelerating. At the same time, OSU appears to have reached a critical tipping point in determining how best to meet its energy future. To ensure the University's highest probability of success, Oregon State University seeks proposals from professional consulting firms to develop and assist in the implementation, maintenance, and evolution of an Integrated Energy Planning Model for OSU. The Integrated Energy Planning Model will provide a decision framework by coordinating the merits, priorities, and challenges of diverse and potentially divergent technical solutions that support a balanced and sustainable environmental and financial future for OSU.

The development of an Integrated Energy Planning Model is a critical tool to improving OSU's ability to make better-informed decisions regarding the University's energy future. Additionally, the model will serve the dual purpose of functioning as a screening-level analytical platform and vehicle for open communication of the operational realities, opportunities, and risks facing the university to diverse audiences including students, faculty, and staff. The model will also support communications among diverse stakeholders regarding the impact of decisions that the institution will face. At the same time, the model must be intuitive and adaptable to continually changing conditions.

2.02 OREGON STATE UNIVERSITY

Founded in 1868, Oregon State University is a comprehensive, research-extensive, public university located in Corvallis. OSU is a member of the Oregon University System and one of only two American universities to hold the Land Grant, Sea Grant, Space Grant and Sun Grant designations. OSU is also the only Oregon institution to hold the Carnegie Foundation's top ranking for research universities, a recognition of the depth and quality of OSU's graduate education and research programs.

Through its centers, institutes, Extension offices and Experiment Stations, OSU has a presence in almost every one of Oregon's 36 counties, including its main campus in Corvallis, the Hatfield Marine Sciences Center in Newport and OSU-Cascades Campus in Bend. OSU offers undergraduate, masters and doctoral degrees through 12 academic colleges enrolling more than 26,000 students from every county in Oregon, every state in the country and more than 90 nations.

3.0 STATEMENT OF WORK

3.01 SAMPLE CONTRACT

A sample contract containing contractual terms and conditions is included at Exhibit A. All terms and conditions are expressly authorized for negotiation. The contract term shall be for two years and may be renewed at OSU's discretion for one (1) additional one (1) year period.

3.02 STATEMENT OF WORK

The following statement of work will be incorporated into the final contract.

The successful Proposer will develop and assist in the implementation, maintenance, and evolution of an Integrated Energy Planning Model for Oregon State University. The project is anticipated to include the following elements:

Category 1: Discovery, Scope of Work, and Metrics (including key performance indicators)

The Proposer will assess OSU's operational characteristics, constraints, and desired outcomes. Based on this information, the Proposer will prepare a detailed scope of the work that will include elements such as the following:

- All demands (peak and annual consumption) for electrical power, and thermal heating and cooling within the OSU main campus.
- Water resource supply and demand within the OSU main campus.
- All means to supply these energy demands and supply-related facilities within the main campus service area.
- Historic, current, and projected greenhouse gas (GHG) emissions and other air emissions arising from the combustion of fuels to meet these demands.
- A “forecast period” including documentation of select historical data captured for previous fiscal years.
- Identify quantitative and qualitative evaluation metrics (measurements and key performance indicators) and sample output reporting conventions. The metrics may address performance relative to: physical plant capacities, reliability, capital investment, university debt capacity, impact of capital investment deferral, cost of service/revenue requirements and associated volatility; GHG and other regulated air emissions; water resource requirements; energy intensity by building and campus precincts, among others.

Category 2: Business as Usual Baseline

The Proposer will develop a Business-as-Usual (BAU) baseline that will reflect projected utility demands including water, fuel consumption, and GHG emissions resulting from previous and anticipated institutional decisions, building design guidelines, and status of deferred maintenance requirements/practices. The preliminary BAU development will include the following:

- A cash flow model that should consider at least the following level of detail to calculate the total Cost of Utility Service:
 - Fuel expense
 - Purchased utilities
 - Non-fuel variable expense
 - Fixed Operations and Maintenance (O&M)
 - Maintenance, renewal, and repair
 - Depreciation
 - Debt service
- Develop a database with assumptions unique to OSU which are needed to effectively forecast electrical, steam, cooling, and water utility requirements and projected GHG emissions in a Business-as-Usual condition for the OSU main campus. Minimally, this database will include documentation sufficient to the analysis being conducted in the following areas:
 - Existing Buildings (Name, Identification, Size, Primary Function, Utility Profiles, etc.)
 - Supply Equipment (primary assets used to provide utilities)
 - Distribution Systems
 - Supply Inputs (volumetric consumption data of input fuels)
 - Supply Outputs (volumetric data of generated/delivered utilities)
 - Financial Parameters (as above and including capital availability and markets)
 - Long-term commodity price forecast(s)
 - Regulations impacting operations
 - Future Loads (known building projects, energy use intensities by primary function, etc.)
 - Non-building loads, as applicable

The database schema should be developed in a way that provides flexibility for future enhancements and additions as required to continue model evolution and expansion, in potential subsequent scopes of work.

- Develop preliminary uncertainty assessments for key BAU and external variables.

- Develop the sample methodology for qualitative evaluation criteria to facilitate discussion within OSU as to the desirability of developing and implementing a more robust, formal approach to the integration of qualitative decision criteria.
- Build initial user interfaces and exercise the model with OSU.
- Refine the BAU as appropriate over time and create recommendations on how to (or whether or not to) connect the BAU to “live” campus data systems. Enable OSU web-based access to the model for university-wide administrative and academic use.

3: Energy Conservation Planning

The Proposer will develop an energy conservation module for the OSU Integrated Energy model which will efficiently leverage and retain OSU’s existing institutional knowledge and information sources. OSU’s data including energy use, space use, and deferred maintenance schedules will be augmented with Building Profiles. The Building Profiles will be developed in collaboration with technical staff and decision makers to develop OSU’s own comprehensive “energy conservation portfolio” technical scenarios. Once created, these can be compared with other possibilities, and used in determining a clear financial direction for prioritized energy conservation measure investments. Building profile surveys will include descriptions of the various building systems for each building, including: Building Function, General Characteristics, Cooling Supply, Heating Supply, Process Cooling, Process Heating, Other Processes, Ventilation, Lighting, Building Envelope, Renewable Energy, and Unique Attributes.

In addition, the Proposer will review the OSU Climate Plan and draft a Climate Plan policy and implementation strategies with a focus on developing the model to test a wide range of CO₂ emission reduction scenarios. The Proposer will assist in the selection, creation, and recommendations of scenarios which balance quantitative and preliminary qualitative considerations including life cycle cost analysis, growth projections, and future energy cost scenarios. Upon completion of this work, the OSU will have recommendations for capital improvements, deferred maintenance, and building renewal criteria, and policy options to achieve energy conservation and reduce the University’s deferred maintenance backlog.

4.0 PROPOSER QUALIFICATIONS

4.01 QUALIFICATIONS

There are no minimum or preferred qualifications for this RFP.

5.0 REQUIRED SUBMITTALS

6.0 EVALUATION

6.01 EVALUATION

The stages of review and evaluation are as follows:

- a. Determination of Responsiveness:

OSU will first review all Proposals to determine Responsiveness. Proposals that do not comply with the instructions or are incomplete may be deemed non-Responsive. Written notice will be sent to Proposers whose Proposal is deemed non-Responsive identifying the reason. A Proposer has the right to appeal the decision pursuant to OAR 580-061-130(5)(a).
- b. First Stage Evaluation:

Those Proposals determined to be Responsive will be evaluated using the required submittals. Proposals will be scored based on the evaluation criteria listed below in section 6.03. Scores will be used to determine Proposer’s within a competitive range. The competitive range will be made of Proposers whose individual scores, when viewed together, form a group of the highest ranked Proposers above a natural break in the scores.

OSU may award after the first stage evaluation to the highest ranked Proposer without moving on to the second stage evaluation. If this option is selected, Written notice of intent to award the Contract to the highest ranked Proposer will be provided to all Responsive Proposers, or an award may be made directly without notice of intent in those instances of a single Responsive Proposer.
- c. Second Stage Evaluation:

It is likely that an award will not made after the first stage evaluation, in which case OSU may choose any of the following methods in which to proceed:

 - i. Issue a Written invitation to Proposers within the competitive range requesting an interview (telephonic or in-person), presentation, site visit or any other evaluative method that is relevant to the goods or services solicited in the Request for Proposal. Written invitations will contain the evaluation criteria and scoring that will be used by the evaluation committee.

- ii. Engage in oral or Written discussions with and receive best and final Proposals from all Proposers in the Competitive Range or all Proposers submitting Responsive Proposals. Discussions may be conducted for the following purposes:
 - Informing Proposers of deficiencies in their initial Proposals;
 - Notifying Proposers of parts of their Proposals for which OSU would like additional information; or
 - Otherwise allowing Proposers to develop revised Proposals that will allow OSU to obtain the best Proposal based on the requirements set forth in this Request for Proposal.
- iii. Enter into negotiation with the highest ranked Proposer regarding the statement of Work, the not-to-exceed amount offered, and contract terms (see section 6.03 Negotiations). If an agreement cannot be reached between OSU and the highest ranked Proposer, OSU will formally end negotiations with that Proposer and may commence negotiations with the next highest ranked Proposer. This process of selecting and negotiating with Proposers will continue until an agreement is reached and an award is made.

The conditions, terms, or price of the Proposal may be altered or otherwise changed during the course of the discussions provided the changes are within the scope of the Request for Proposal. Best and final Proposals will be scored based on the evaluation criteria listed below in section 6.03.

Points awarded in the first stage evaluation will not be carried to the second stage evaluation. Contract will be awarded to the Proposer who in OSU's opinion, best meets the requirements and qualifications of the RFP and OSU's needs.

d. Additional Stages of Evaluation:

If after completion of the second stage of evaluation, an award is not made, OSU may add another stage of evaluation using any of the methods outlined in the second stage evaluation above.

6.02 EVALUATION CRITERIA

Points will be given in each criteria and a total score will be determined. The maximum points available for each criterion are identified below.

<u>Evaluation Criteria</u>	<u>Points</u>
Proposal relative to Proposer Personnel section	40
Proposal relative to the Proposer Experience section	30
Proposal relative to the Project Management Strategies section	20
Proposal relative to the Proposer Overview and Projects section	10
Total	100

6.03 NEGOTIATIONS

OSU may commence serial negotiations with the highest ranked Proposer or commence simultaneous negotiations with all eligible Proposers. OSU may negotiate:

- a. The statement of Work;
- b. The Contract price as it is affected by negotiating the statement of Work; and
- c. Any other terms and conditions determined by OSU in its sole discretion to be reasonably related to those expressly authorized for negotiation.

Terms and conditions within the sample contract that are unrelated to the statement of work or Contract price may be negotiated after award, but before legal review or execution of the Contract.

6.04 INVESTIGATION OF REFERENCES

OSU reserves the right to investigate and to consider the references and the past performance of any Proposer with respect to such things as its performance or provision of similar goods or services, compliance with specifications and contractual obligations, and its lawful payment of suppliers, subcontractors, and workers. OSU further reserves the right to consider past performance, historical information and facts, whether gained from the Proposal, Proposer interviews, references, OSU or any other source in the evaluation process. OSU may postpone the award or execution of the Contract after the announcement of the notice of intent to award in order to complete its investigation.

7.01 APPLICABLE STATUTES AND RULES

This Request for Proposal is subject to the applicable provisions and requirements of the Oregon Revised Statutes, Oregon Administrative Rules, and OSU Policies and Procedures.

7.02 MANUFACTURER'S NAMES AND APPROVED EQUIVALENTS

Unless qualified by the provision "NO SUBSTITUTE" any manufacturers' names, trade name, brand names, information and/or catalogue numbers listed in a specification are for information and not intended to limit competition. Proposers may offer any brand for which they are an authorized representative, which meets or exceeds the specification for any item(s). If proposals are based on equivalent products, indicate in the proposal form the manufacturers' name and number. Proposers shall submit with their proposal, sketches, and descriptive literature, and/or complete specifications. Reference to literature submitted with a previous proposal will not satisfy this provision. Proposers shall also explain in detail the reason(s) why the proposed equivalent will meet the specifications and not be considered an exception thereto. Proposals that do not comply with these requirements are subject to rejection. Proposals lacking any written indication of intent to provide an alternate brand will be received and considered in complete compliance with the specification as listed in the RFP.

7.03 REQUESTS FOR CLARIFICATION OR CHANGE

Requests for clarification or change of the Request for Proposal must be in Writing and received by the Administrative Contact no later than the Deadline for Request for Clarification or Change as specified in the Schedule of Events. PCMM will notify potential Proposers through publication of the Addenda on the OUS procurement website. If you have received a Request for Proposal you are advised to consult the OUS procurement website, prior to Proposal submittal, to ensure that you have not missed any Addenda. Proposers are not required to return Addenda with their Proposal. However, Proposers are responsible for obtaining and incorporating any changes made by the Addendum into their Proposal. Failure to do so may, in effect, make the Proposal non-Responsive, which may cause the Proposal to be rejected.

7.05 PREPARATION AND SIGNATURE

All Required Submittals must be Written or prepared in ink and signed in ink by an authorized representative with authority to bind the Proposer. Signature certifies that the Proposer has read, fully understands, and agrees to be bound by the Request for Proposal and all Exhibits and Addenda to the Request for Proposal.

Only those Proposals received at this e-mail address by the Due Date and Time will be considered Responsive; do not e-mail a copy of the Proposal to any other e-mail address. Proposals submitted directly to the Administrative Contact e-mail address will NOT be considered Responsive. It is highly recommended that the Proposer confirms receipt of the email with the Administrative Contact noted above or by calling 541-737-4261. The Administrative Contact may open the e-mail to confirm receipt but will NOT verify the integrity of the attachment(s), answer questions related to the content of the Proposal, or address the overall Responsiveness of the Proposal.
- 2) Hard copy in a sealed package or envelope dropped off in person or delivered to the submittal location listed on the Request for Proposal cover sheet. The package or envelope should be addressed to the Administrative Contact.
